

Exploring the Depths of Disability Discrimination

In this presentation, we skim the surface of disability basics before diving into four particular challenges faced by school districts dealing with disability discrimination and accommodation issues – abuse of leave, uncooperative employees, effective documentation, and retaliation claims. We will guide participants through the various laws and regulations that create and shape school districts’ obligations towards their disabled employees and highlight key considerations in developing effective internal policies and practices. Participants will develop further insight by issue-spotting potential obstacles and developing practical solutions based on relevant legal developments.
